

N.Y.CO.,LTD.

Electric Powered, The Next Generation Vessel Service Cart.

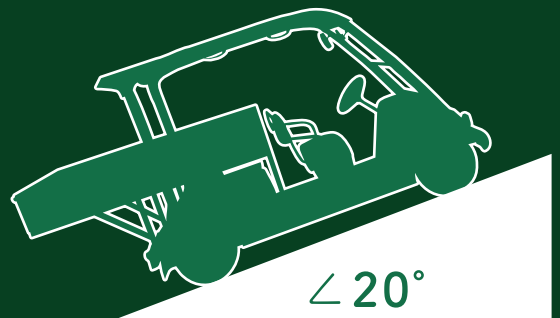

Earth Friendly Cart

We reuse 2nd-hand electric golf cart and remodeling it to suit for vessel use, that is "Beele". Different from gaspowered car, electric-powered cart "Beele" does not emit exhaust gas, noisy sound and heat. That improves crew's working condition much better.

Compare with gas-powered mini truck, structure is very simple, you can learn how to drive "Beele" just 5minutes. In addition, speed limit is set at 12km/h, which reduces unexpected crash and injury.

Using "Beele" is one of the easiest actions to SDGs. Change the vessel environment better, leading to making the world environment better.

Max. climbing angle is 20°, no problem drive through a rampway and a sloping path in PCC

Charging is just to connect "Beele" and Vessel outlet by charging cable.

Beeacle's Information

Zero-Emission

0cc

Electric-powered cart "Beeacle" does not emit GHG at all. "Beeacle" installed restored lead-acid battery as its drive battery. That is why we call "Beeacle" the next generation vessel service cart.

Max. Load

200kg

When balanced load, up to 200kg "Beeacle" is also capable of 200L drum.

Max. Climbing Angle

20°

Max. slop angle is about 12° to 15° in general PCC, then no problem to drive in your Vessel.

SPEED LIMIT

12km/h

This limit prevents vessel crew from overspeeding and unexpected accident and crash.

*speed limit can be set to 19km/h by maker engineer.

Easy-to-Drive

5min

Operation is just to choose forward or backward, and then step on accelerator pedal to start driving. If you do not have driver's license, you can learn how to drive "Beeacle" just 5 min.

Customizing

∞

There are many options to customize "Beeacle" suitable for your Vessel use, such as modifying size of load platform, installing head light, side mirrors and so on. Just contact us!

Service Life

10years

Reference Price

¥698,000~

Warranty Period

2years
